OBJECTIVE
Passionate, industrious, motivated web developer looking to continue professional growth in a team on scalable applications.

EXPERIENCE

Astreya Inc, onsite at Google   Mountain View, CA
Junior Developer   March 2014-Present
Rapidly prototype applications for CorpNet team and build internal network applications.
- Helped integrate agile practices into team workflow, resulting in organized, documented, and accountable work.
- Refactored existing prototypes for readability and stability. This allowed for 3 new product launches.
- Quickly became project lead on 3 products used daily by Google staff.
- Worked with internal Google teams to launch corporate network performance tool that analyzes nearly 1 million automated data entries daily.
- Utilized "follow-the-sun" development to expedite new product launches.
- Created team UI/UX standards library.

NanoSatisfi   San Francisco, CA
Software Engineer Intern   September 2013-December 2013
Owned projects to support the software team that launched the world's first crowd-funded satellite.
- Developed an internal dashboard that displayed engineering & business (**Ruby on Rails, GitHub API, jQuery**).
- Extended functionality of existing application to support new requirements and features (**Ruby on Rails, Active Admin, ActionMailer, AJAX, Redis**).
- Assisted in the conversion of an online IDE from a web plug-in to a daemon (**Python, Symfony, PHP**).
- Was primary developer on corporate site (**WordPress, PHP**).
- Created mockups to help implement UI/UX changes for feature product site (**Ruby on Rails, jQuery, Twitter Bootstrap**).
